ELECTRICAL SPRAY GUNS

W95 SPRAY GUN

W95 AIRLESS SPRAY GUN

PRODUCT FEATURES

- The new entry level model - easy handling and operating.
- Ideal for spraying primers, lacquers, wood preservatives, pesticides, polishes and oils. Particularly suitable for spraying wooden fences, shutters, garage doors and wicker furniture.
- Output-Control-System - paint delivery regulator.
- Includes 0.8 mm round jet nozzle for optimised spray pattern.
- Removable cup and nozzle for easy cleaning.

TECHNICAL DATA

Power: 70 W

Nozzle size: 0.8 mm round jet nozzle

Delivery max.: 140 g/min

Max. spraying pressure: 120 bar

Reservoir capacity: 600 ml

HIGH VOLUME LOW PRESSURE - SYSTEMS

FOR INTERIOR WALL PAINTS.

W665 WALL PERFECT

PRODUCT FEATURES

- Specially developed spray system for interior wall paint.
- Edges and corners can now be sprayed - no troublesome pre-coating with a brush.
- High working speed due to optimized flow rate.
- Precise and comfortable working with adjustable paint jet.
- Extra large 1.8 litre cup for a 12 m² coverage.
- Includes paper funnel for easy filling.
- Easy to clean.

TECHNICAL DATA

Power: 350 W
Paint flow: smoothly regulated from max. 0-250 g/min
Reservoir capacity: 1800 ml
Air hose length: 3.5 m

W985E WALL PERFECT

PRODUCT FEATURES

- Innovative Spray system for interior wall paint.
- Direct suction from the original paint bucket - no refilling necessary.
- Convenient spray-lance for easy painting of walls and ceilings.
- Edges and corners can now be sprayed - no troublesome pre-coating with a brush.
- New nozzle-technology that guarantees optimal atomisation and a high working-speed.
- Variable flow-control makes it possible to adapt working-speed up to 3.5m²/min to suit individual needs.
- A precise, compact-spray jet enables accurate working around windows, doors or sockets.
- Ergonomical design, increased control-panel and a handy spray-lance.
- Self-cleaning pump unit.

TECHNICAL DATA

Power: 600 W
Atomisation power: 140 W
Turbine: 2-stage
Paint flow: smoothly regulated 0 - 525 ml /min
Working radius: 8.5 m
Spray-lance length: 70 cm

PROJECT SERIES 115

PROJECT SERIES 115

PROJECT 115

PRODUCT FEATURES

- Mobile paint spray system for the ambitious DIY enthusiast.
- Removable, extra large paint container to make cleaning and refilling easy
- 2-stage pressure adjustment for different applications
- Lightweight metal gun with 2 reversible hard metal nozzles (M / 0,015 and XS / 0,009)
- Double filter system
- Clever cart with telescopic handle for easy moving, and integrated hose and cord reel.
- Particular suitable for interior walls, garage doors, summer houses, wooden fences and doors. Ideal for applying lacquers, stains, interior wall emulsion or interior wall latex paints, varnishes, wood preservatives and primers.
- Not suitable for exterior wall paints.

TECHNICAL DATA

Power consumption: 625 W - 230V 50Hz

Max. nozzle size: M / 0.015

Min. nozzle size: XS / 0.009

Max. flow rate: 0.8 litre/min

Max. spraying pressure: 190 bar

Reversible nozzle: M for thick materials; S for thin materials

Reservoir capacity: 9.5 litres

Hose length: 7.5 m

PROJECT SERIES 117

PROJECT 117

PRODUCT FEATURES

- Compact piston pump for small up to medium-sized projects.
- For the application of interior and exterior wall paints as well as solvent-based products.
- Compact floor-mounted appliance with carry handle.
- High-quality metal spraygun with practical reversible tip - clogged nozzles can be cleaned in seconds.
- Wide operating range - 7.5 m high-pressure hose
- Scope of delivery: Carbide nozzle size L / 4.3mm
- 2 Stainless cartridge filters L - XXL

TECHNICAL DATA

Power consumption: 670 Watt
Max. nozzle size: L/ 0.43mm
Pistol: PP-05
Max. flow rate: 0.95 litre/min
Hose length: 7.5 m

W15 POWER STEAMER

W15 POWER STEAMER

PRODUCT FEATURES

- Ideal for trouble-free steam removal of old wallpaper.
- Fill with water, connect to the power point and away you go !
- 2 Year Warranty.
- Three piece steam bar for removing complete lengths or small, narrow strips of wallpaper.
- Environmentally friendly work - no chemical additives.
- Power-Steam-Control: Integral automatic cut-out protects against overheating.
- Comfortable work with 3.5 m long, very flexible rubber steam hose.
- Quick, clean and easy to use.
- Integral perforation roller available as a special accessory.

TECHNICAL DATA

Power input: 2000 W
Steam duration: max. 80 min.
Boiler capacity: 4 litres
Steam generation: 50 g/min
Hose length: 3.5 m
Steam bar weight: 145 / 240 g
